Charles V. Chapin and the Public Health Movement

By **JAMES H. CASSEDY**

"... a valuable and lucid study of Dr. Chapin's life. It is well-documented, clearly written, and intelligently conceived. ... all students of American medicine are very much in Dr. Cassedy's debt." —*Bulletin of the History of Medicine*

"... we are fortunate indeed to have this excellent biography. ... As Cassedy traces the activities of Chapin ... one can see the emergence of public health as we know it today. ... This book should be in the library of every person and institution concerned with the health of the community ... a solidly based, well-written book that deserves wide distribution. ..." —*American Journal of Public Health* \$5.75

Zimmerman & Veith: GREAT IDEAS IN THE HISTORY OF SURGERY

"This is a wonderful book! It is not merely about great men and great ideas in surgery, but rather the statements of these great men in their own words, together with a discerning and enlightening biographical and historical introduction in each case."—*Canadian Medical Assoc. Jnl.*

1961 599 pp., 115 figs., 2 col pls. \$15.00

Adams: THE GENUINE WORKS OF HIPPOCRATES

An excellent opportunity to rediscover the beginnings in classical times of the art and science of medicine. Translated by Francis Adams, LL.D., Surgeon.

1939 376 pp., 8 pls. \$7.00

Sarton: INTRODUCTION TO THE HISTORY OF SCIENCE

These three volumes are basic to every historian's shelf. Comprehensive and accurate, they contain descriptions, evaluations, and bibliographies of practically every scientist whose name comes down to us in history.

Vol. I: From Homer to Omar Khayam
1927 (reprinted 1950) 850 pp., \$10.00

Vol. II: From Rabbi Ben Ezra to Roger Bacon
1931 (reprinted 1950) 1302 pp., \$20.00

Vol. III: Science and Learning in the 14th Century
1947 (reprinted 1962) 2201 pp., 18 figs., \$22.00

Skinner: THE ORIGINS OF MEDICAL TERMS, 2nd ed.

Both an erudite work of reference, and an entertaining bedside reader. In addition to the simple linguistic etymology, the reader will find that practically every word has in its past a fascinating history.

1961 447 pp., 350 figs. \$12.50

Ivy: A LINK WITH THE PAST

The delightfully witty autobiography of "the father of American Plastic Surgery."

1962 116 pp., 20 figs. \$4.00

Sykes: ESSAYS ON THE FIRST 100 YEARS OF ANESTHESIA (Two volumes)

In addition to his duties as anesthetist to several British hospitals, Mr. Sykes was an accomplished mystery-story writer. These two talents are brought to bear, with a certain heavy humor, on such topics as the reputation of the Scottish school of anesthesia.

1960, 1961 366 pp., 36 figs. Set: \$14.00

SHAKESPEARE'S SON-IN-LAW: JOHN HALL MAN AND PHYSICIAN

By Harriet Joseph

Yet another facet of Shakespeare's life and times is carefully examined in Mrs. Joseph's study of Dr. John Hall. The doctor's own casebook has been extensively annotated and, in the assembling of existing biographical details and materia medica, new insights have been added to the body of knowledge on day-to-day Elizabethan life as well as on Shakespeare's immediate circle of friends and relations.

Three Hundred Years of Psychiatry, 1535-1860. *A History Presented in Selected English Texts.*

By RICHARD HUNTER and IDA MACALPINE. This first fully documented chronicle of the beginnings of British psychiatry covers an unprecedented range of original source material, both printed and manuscript, from public and private archives. Since the rise of psychiatry is closely linked to social history and the humanities, Doctors Hunter and MacAlpine have combed not only the writings of physicians and psychologists, but those of jurists, philanthropists and philosophers, as well as reports of British Parliamentary Committees and the Statutes of Great Britain. Writers quoted include Sir Thomas More, King James I, Francis Bacon, William Harvey, John Locke, Robert Boyle, Daniel Defoe, Benjamin Franklin and Charles Dickens, in addition to many who are obscure and anonymous. Original spelling is used, and interesting title pages and bits of manuscript are reproduced. *1105 pages; 204 line figs. \$13.45*

A History of the Worshipful Society of Apothecaries of London. *Volume I, 1617-1815*

Edited by E. ASHWORTH UNDERWOOD. The original text of this history by the late Dr. Charles Cameron (based on notes left by a former Master of the Society) has been revised and largely re-written. Dr. Underwood, basing his commentary on a detailed study of manuscript records and other extensive archives, traces the Society from its creation as a City Livery Company in 1617 through the first two centuries of its existence, when it was active in a large scale manufacture of drugs and the illegal practice of medicine. The work provides much new material about little-known apothecaries and physicians of note. *27 halftones \$8.80*
