

AMERICAN ASSOCIATION
for the
HISTORY OF MEDICINE

Thirty-Eighth Annual Meeting

Philadelphia
April 29-May 1, 1965

The Scotch thistle symbolizes the bond between this country's first medical school and the University of Edinburgh. The Philadelphia physicians who founded the University of Pennsylvania School of Medicine in 1765 had earned their medical degrees at Edinburgh, and Edinburgh was their pattern in establishing their teaching programs in the New World. On the University campus today, the thistle emblem is carved over the entrance to the Medical School building, and it is the decorative theme of the plaque in the entranceway of the Alfred Newton Richards Medical Research Building.

AMERICAN ASSOCIATION
for the
HISTORY OF MEDICINE

Purposes: To promote research, study, interest, and writing in the history of medicine, including the history of public health, dentistry, pharmacy, nursing, and allied arts, sciences, and professions.

Activities: Meetings, exhibits, the Fielding H. Garrison Lecture, the awarding of the William H. Welch and of the William Osler medals, and the stimulation of research in the history of American medicine.

Membership: Persons interested in the history of medicine are eligible for membership upon nomination in writing by an Active Member and election by the Membership Committee.

Publication: BULLETIN OF THE HISTORY OF MEDICINE.

Annual Dues: Active Members: \$7.50; Nonresident Members: \$7.50; Constituent Societies: \$10.00.

For further information and for membership apply to the Secretary.

DR. JOHN B. BLAKE
c/o National Library of Medicine
Bethesda, Maryland 20203

**NEW, OUT-OF-PRINT,
RARE MEDICAL BOOKS**

*We hope you will stop by to browse in
our out-of-print book department. We
have many titles that will interest you.*

From SAUNDERS . . . Outstanding Publications on the History of Medicine

Abt—Garrison History of Pediatrics

This remarkable volume presents a remarkable panorama of the field of pediatrics — beginning with ancient Egypt and following through to the present. You'll find fascinating discussions on topics ranging from *infanticide among savages* and *birth control in Baby-*

lonia to modern-day concepts of *molecular heredity* and *pediatric surgery*.

A Special Re-issue of History of Pediatrics by the late FIELDING H. GARRISON, which first appeared as the initial chapter of Isaac Abt's famous 8-volume *Pediatrics*. Additional sections newly contributed by ARTHUR F. ABT. 316 pages, 6 $\frac{3}{8}$ " x 9 $\frac{1}{4}$ ", illustrated. \$11.50.

New—Just Ready!

Cutter & Viets—Short History of Midwifery

Here is the intriguing story of the development of midwifery—a startling tale of superstition, ignorance, and ingenuity. In this scholarly account the authors trace the practice of midwifery from 14th century England to 19th century America. You'll find many

quotations from early physicians and midwives, and delightful illustrations of these pioneers and their equipment.

A Reprint of the account written by IRVING S. CUTTER for Arthur Hale Curtis' famed 8-volume *Obstetrics and Gynecology* (1933). With new supplementary notes by HENRY R. VIETS. 260 pages, 6" x 9", illustrated. \$8.50.

Published November, 1964.

Garrison—History of Medicine

A virtual classic in its field, this colorful chronology of medicine through the ages begins with primitive times and offers a complete history up to the decade following World War I. Through-

out the book you'll find many rare portraits and brief biographic sketches of medicine's great personalities.

By the late FIELDING H. GARRISON, M.D. 996 pages, 6" x 9", illustrated. \$13.50.

Fourth Edition (1929)—Reprinted April, 1960.

Coming in June! Earle—Surgery in America: From the Colonial Era to the Twentieth Century

The *Selected Writings* which comprise this brand-new book offer you the story of surgery's growth in America to 1900—as told by the men who contributed most to its progress. You'll find key writings by such men as McDowell,

Warren, and Dorsey, plus items from texts, lectures, and articles that shaped the practice and philosophy of American surgery.

Edited by A. SCOTT EARLE, M.D. About 320 pages, 6 $\frac{5}{8}$ " x 10", illustrated. About \$12.00.

New—Ready in June!

Whitteridge: THE ANATOMICAL LECTURES OF WILLIAM HARVEY

This new book contains all that is known to remain of Harvey's anatomical writings. It comprises two sets of lecture notes; one of these on muscles, is printed here for the first time. A very carefully annotated text, both in English and in Latin (Harvey lectured in Latin).

Edited, with an introduction, translation and notes by Gweneth Whitteridge, M.A., D.Phil., F.S.A.

1964 568 pp., 8 figs. \$20.50

Sarton: INTRODUCTION TO THE HISTORY OF SCIENCE

Three volumes basic to every historian's shelf. Comprehensive and accurate, they contain descriptions, evaluations, and bibliographies of practically every scientist whose name comes down to us.

In three volumes, 4353 pages \$52.00

Adams: THE GENUINE WORKS OF HIPPOCRATES

An excellent opportunity to rediscover the classical beginnings of the art and science of medicine. Translated by Francis Adams, LL.D., Surgeon.

1939 376 pp., 8 pls. \$7.00

Skinner: THE ORIGINS OF MEDICAL TERMS

Both an erudite work of reference, and an entertaining bedside reader. Practically every word has in its past a fascinating story.

1961 447 pp., 350 figs. \$12.50

Zimmerman & Veith: GREAT IDEAS IN THE HISTORY OF SURGERY

"This is a wonderful book! It is not merely about great men and great ideas in history, but rather the statements of these great men in their own words, together with a discerning and enlightening introduction by the authors."—*Canadian Medical Assn. Jnl.*

1961 599 pp., 115 figs., 2 col. pls. \$15.00

**HISTORY AND GEOGRAPHY
OF THE MOST IMPORTANT DISEASES
(GESCHICHTE UND GEOGRAPHIE DER WICHTIGSTEN
KRANKHEITEN)**

The Geography of diseases is only currently being recognized and studied. This book traces the history and geography of 40 of the most important diseases. A MUST FOR EVERY PATHOLOGIST AND MEDICAL STUDENT.

ISLER, H.

THOMAS WILLIS

Willis was remarkable for his careful clinical observation. He was second only to Sydenham in his day. To him we owe the original descriptions of several conditions. (Garrison and Morton). This translation brings to light one of the forgotten "greats" in the field of medicine.

Two Centuries of Medicine

A History of the School of Medicine,
University of Pennsylvania

By *George W. Corner, M.D., Sc.D., LL.D.*

The School of Medicine of the University of Pennsylvania has a special place in American Medicine. It is the nation's oldest medical school—older, in fact, than the nation itself. To mark its two hundredth birthday, Dr. Corner has compiled a history of these two centuries—years filled with men's ideas, growth and change, service and greatness.

What he has written is not simply a record of a great medical school. With much charm, taste and insight, he has given a picture of an important segment of American medical history. It is a glimpse into the whole kaleidoscope of revolutionary and often painful change and the ultimate attainment of this country's leadership in world medicine. The history of the University of Pennsylvania's School of Medicine parallels and epitomizes this achievement.

from OXFORD . . .

**A History of the Royal College
of Physicians of London
Volume I**

By SIR GEORGE CLARK, *Fellow of the British Academy and of All Souls College, Oxford.*

From its foundation in 1518 the Royal College of Physicians has played an essential part in the development of the medical profession and medical services in England. This volume, based on original sources, is the first to give a continuous account of the College as an institution and of its place in social history. Beginning with background on the healing arts in early Tudor England, the first volume covers the period to the Revolution of 1688.

The author "has firmly set the general development and internal organization of the college against the background of the great political and social changes of Tudor and Stuart England. This is done in such a masterly manner that all earlier accounts of the practice of medicine in England are now superseded."

Circulation of the Blood:

Men and Ideas

Edited by ALFRED P. FISHMAN, M.D., *Associate Professor of Medicine,* and DICKINSON W. RICHARDS, M.D., *Lambert Professor of Medicine Emeritus, Columbia University College of Physicians and Surgeons.*

This new volume chronicles the development of cardiovascular physiology over the centuries by focusing on the lives and achievements of those leaders whose original ideas about "the motion of the heart and blood" gave impetus to the massive forward progress in this particular branch of science. The contributors are all distinguished physiologists who themselves have made important contributions in their own fields of cardiac or circulatory physiology. Over 200 illustrations, a number of which are newly discovered and have never been published before, are included. \$18.00
