Cover — *Aquilegia vulgaris*; Columbine.

Sketch by LEONARDO DA VINCI

The Columbine is the state flower of Colorado.

“The leaves of Columbines are commonly used in lotions with good success for sore mouths and throats . . . Tragus saith, that a dram of the seed taken in wine with a little saffron, opens obstructions of the liver, and is good for the yellow jaundice, if the party after the taking thereof be laid to sweat well in bed. . . . The Spaniards used to eat a piece of the root thereof in the morning fasting, many days together, to help them when troubled with the stone in the reins or kidneys.”
—CULPEPER
