Self-Destruction in the Promised Land:
A Psychocultural Biology of American Suicide
HOWARD I. KUSHNER
280 pp. Cloth, $24.95.

Why, when faced with a similar set of circumstances, does one person commit suicide while another does not? In this first interdisciplinary history of suicide in the United States, Kushner addresses this fundamental question about suicide.

“Outstanding . . . the only work I know that is adequate to the complexity and multidimensionality of suicide, and which genuinely combines, indeed synthesizes, a wide range of disciplinary perspectives into a coherent and satisfying view of the issues. . . . a tour de force.”
