WHERE HAVE ALL THE BABIES GONE?

The Sterilization Movement in the Cold War Era

IAN R. DOWBIGGIN

Many would be surprised to learn that the preferred method of birth control in the United States today is actually surgical sterilization. This book takes an historical look at the sterilization movement in post-World War II America, a revolution in modern contraceptive behavior. Focusing on leaders of the sterilization movement from the 1930's through the turn of the century, this book explores the historic linkages between environment, civil liberties, eugenics, population control, sex education, marriage counseling, and birth control movements in the 20th-century United States.

FLESH AND BLOOD

**Organ Transplantation and Blood Transfusion in
20th Century America**

SUSAN E. LEDERER

This book will be the first to bring together the histories of blood transfusion and organ transplantation. It will show how these two fields redrew the lines between self and non-self, the living and the dead, and humans and animals. Drawing on newspapers, magazines, legal cases, films and the papers and correspondence of physicians and surgeons, Lederer will challenge the assumptions of some bioethicists and policymakers that popular fears about organ transplantation necessarily reflect timeless human concerns and preoccupations with the body. She will show how notions of the body- intact, in parts, living and dead- are shaped by the particular culture in which they are embedded.

MÜLLER'S LAB

LAURA OTIS

C.Many structures in the human body are named after Johannes Muller, one of the most respected anatomists and physiologists of the 19th century. Muller taught many of the leading scientists of his age, many of whom would go on to make trail-blazing discoveries of their own. Among them were Theodor Schwann, who demonstrated that all animals are made of cells; Hermann Helmholtz, who measured the velocity of nerve impulses; and Rudolf Virchow, who convinced doctors to think of disease at the cellular level. This book tells Muller's story by interweaving it with those of seven of his most famous students.

2008 Call for Applications

Robert Wood Johnson Foundation Investigator Awards in Health Policy Research

The Robert Wood Johnson Foundation Investigator Awards in Health Policy Research program funds highly qualified individuals to undertake broad studies of the most challenging health policy issues facing America.

Approximately 10 grants of up to \$335,000 each will be awarded to investigators from a variety of disciplines to support projects that combine creative and conceptual thinking with innovative policy-relevant approaches.

Applications are welcomed from investigators in the health, social and behavioral sciences as well as other fields. We seek a diverse group of applicants including minorities and individuals in nonacademic settings such as research firms and policy organizations. Applicants must be affiliated either with educational institutions or with 501(c)(3) nonprofit organizations located in the United States or its territories. Past awardees are not eligible to apply.

Letter of Intent Deadline

March 26, 2008

The complete call for applications is available on the program's Web site at www.investigatorawards.org or by calling (732) 932-3817.

A national program of the Robert Wood Johnson Foundation.

The Robert Wood Johnson Foundation focuses on the pressing health and health care issues facing our country. As the nation's largest philanthropy devoted exclusively to improving the health and health care of all Americans, we work with a diverse group of organizations and individuals to identify solutions and achieve comprehensive, meaningful and timely change.

For more than 35 years we've brought experience, commitment and a rigorous, balanced approach to the problems that affect the health and health care of those we serve. When it comes to helping Americans lead healthier lives and get the care they need, we expect to make a difference in your lifetime.

For more information visit www.rwjf.org.

Sign up to receive e-mail alerts on upcoming calls for proposals at www.rwjf.org/services.

AMERICAN ASSOCIATION FOR THE
HISTORY OF MEDICINE
81st Annual Meeting

Continuing Medical Education
— ACCREDITATION —

This activity has been planned and implemented in accordance with the Essential Areas and Policies of the Medical Society of the State of New York (MSSNY) through the joint sponsorships of The Rochester Academy of Medicine and The American Association for the History of Medicine. The Rochester Academy of Medicine is accredited by the MSSNY to provide continuing medical education for physicians.

The Rochester Academy of Medicine designates this educational activity for a maximum of 20 hours of AMA PRA Category 1 Credit(s)™. Each physician should claim credit commensurate with the extent of their participation in the activity.
